## C. J. BRAREN

## Quality Bread

There is a peculiar something about Barber's Bread that makes it stand out prominently in many homes in this town—it has a tastiness that causes the children and grown-ups to marvel at its goodness. The answer is, Quality, and that is because the best wheats and other ingredients of the highest nutrition, combined with modern methods of baking go into every loaf. We serve quite a number of the citizens daily, and we can serve you too. Buy a loaf of our bread today and you will appreciate this. Our cakes and pastries are equally good, and prices are reasonable.

## CLARESHOLM LOCAL NEWS

O. D. Walker has been on the sick list this week.

Mrs. Locke left on Thursday for a visit to Calgary.

W. Moffatt has been in Calgary during the past week.

Born, to Mr. and Mrs. Stanley Carey, on May 5th, a daughter.

Albert E. Strange has been appointed sheriff's bailiff for this district.

The stores will be closed on the 24th, on account of it being Empire Day.

Mr. and Mrs. George Fenton lost a baby girl this week. The funeral took place on Tuesday.

Mrs. Grant Clark who has been in town for several months, moved out to the ranch on Thursday.

Miss Amy Elvorn, of the Holy Cross Hospital, Calgary, spent Sunday with her parents.

Rev. Locke leaves for Macleod Monday to attend the annual district meeting of the Methodist church.

Mrs. J. M. Harrison left on Monday for Edmonton where she will reside with her daughter, Rev. Mrs. Reid.

On Monday and Friday old time dust storms visited this section. The high wind did considerable damage to grain.

Mr. and Mrs. Felix Blandford, of Louisville, Kentucky, are the guests of their cousins, Mr. and Mrs. Joe Dunn of Clareholm.

J. McCrimmon has moved into his new business stand next door to the American Restaurant and will welcome his old customers at any time.

Wednesday, half holidays will be in effect in Clareholm again this summer. Beginning June 9 the stores will be closed from 12 o'clock every Wednesday.

On Monday last the following nominations were made for town councillors to fill the vacancies: E. Atkinson, A. E. Quail, F. H. Schooley, A. Hutton. The election will be held on Tuesday, May 25th.

The Rev. Ernest Thomas, of Toronto, will be in Clareholm on May 24th and will preach in the Presbyterian church in the morning and in the Methodist church in the evening. Do not fail to hear this great writer and preacher.

The G. W. V. A. boys are putting on a guessing contest. A splendid team of big roan mares, with fine colts, worth at least \$6500, is the prize offered, and will go to the best guesser on the number of beans in a jar. The jar can be seen in Reinecke's window. The price will be one dollar per guess.

The Odd Fellows will observe their anniversary by attending divine service in a body on next Sunday evening, May 23rd. It will be a union service and will be held in the I. O. O. F. Hall. Rev. Mitchell and Rev. Locke will conduct the service, the former preaching the anniversary sermon. The members of the order will meet at the lodge room at 6:30 and will parade before the service. It is hoped to have the band lead the parade. All Odd Fellows are requested to attend.

If you saw that greatest of all war dramas, "The Heart of Humanity," you remember the perfect villainy of the young German officer in that picture, elegant, beautifully mannered, black of heart. Well, you can see him again, this time the star of the most gripping photodrama produced in many years. And all recollections of villainy will sink into insignificance when you see Stroheim portray here the tempter who strives to separate Dr. Robert Armstrong and his beautiful young wife. Here, ladies and gentlemen, is the most absorbing picture of human passions that ever held you breathless from beginning to end. You must not miss it. Eric von Stroheim's wonder play, "Blind Husbands," the most enthralling picture of modern time. Written by Stroheim, directed by Stroheim, and starred in by Stroheim. Coming to the Rex Friday and Saturday, June 11th and 12th.

## NOTICE

Notice is hereby given that a petition has been presented to the Council of the Town of Clareholm under the provisions of the Early Closing Act, praying for a renewal of the early closing by-law No. 137 (already approved by the Lieutenant Governor) for the year 1920; and

Notice is hereby further given that objections to the petition presented to the Council praying for the passing of such renewal on the ground that such petition is insufficiently signed or otherwise affecting the validity or sufficiency thereof, must be filed with the Secretary-Treasurer of the Town of Clareholm on or before the 3rd day of June 1920, and that if no such objections are filed before the said date the Council will proceed forthwith to pass the said renewal to be by-law No. 137.

W. C. Miller, Secy.-Treas.,  
Town of Clareholm.

## J. B. BOESE

## Advocates Federal Aid For Development of Alberta Coal Resources

In delaying the development of natural resources in the house of commons, Major D. L. Redmond, Calgary, said he had no use for the general idea put forth by Socialists about state control, but he believed the government could do some very useful and valuable work in this field. He said he was not in favor of a state scheme to see that the natural resources were developed along right and proper lines.

Major Redman urged a definite government policy of co-operation in the development of natural resources. Scientific research, along this line should be encouraged in every possible way and no policy of "fencing off" the ground should be allowed to interfere with the sound development of the country's resources. Until some definite decision was made about handling over the province's natural resources to the province, responsibility for the development of these resources on the Dominion government, said Major Redman, and even if the responsibility was delegated to the provinces later on, there would be no harm in the Dominion government's useful field for controlling the standardization and providing for the development of commodities. Such matters as exchange can be within that scope.

Major Redman spoke at length on the natural resources of the Dominion government, he said, ought to co-operate by assisting scientific research into the possible utilization of low grade iron and coal. If these

## Romance Of Handley Page

Absorbed in Work of Designing Aeroplanes For 14 Years

The romance of Frederick Handley Page and the romance of the evolution of the large, commercial aeroplane are one and the same thing. The brilliant aeronautical engineer and inventor is only 34 years of age, and he has been absorbed in the work of designing aeroplanes for 14 years. Beginning his trade as an electric engineer with the firm of Johnson and Phillips in Glasgow, Scotland, he made a name for himself by a profound paper in "Design of Direct Current," read before the Institute of electrical engineers, the Westinghouse Company of Pittsburgh, immediately made him a tempting offer to take over experimental work, but he refused, believing it to be his life work to build perfect flying machines.

His first experiment in 1906 took the form of a small box kite, "a most outrageous idea," as his own later words. From this he proceeded to the construction of monoplane of original design, which were not very successful. In 1911 he commenced work on the larger type of machines, which were used with success during the last few months he has developed a commercial aeroplane that is regarded as being amazingly successful.

## Building Activity

Alberta Building Programme For This Year Involves Sum of Fifteen Millions

New buildings to the value of \$15,000,000 will be erected in Alberta during the present year. This estimate has been arrived at by A. R. Whittemore who is the general manager of the McLean daily reports, an organization meaning to the building trade in Canada what Dun or Bradstreet mean to the financial world.

Mr. Whittemore observes there is a notable tendency to erect commercial buildings in Alberta, while at least 500 houses will be built in the province during the next six months. At least forty additional schools are being planned which will tend to swell the building programme of the province.

Offices, warehouses and theatres are also among the buildings contemplated.

Several of the cities of Western Canada listed more building permits last month than they have done in the corresponding month for several years past. At Winnipeg, Manitoba, their value exceeded \$550,000; at Calgary, Alberta, \$334,000; and at Saskatoon, \$200,550.

## Cost of Sleight-of-Hand Trip

According to a return table in the House of Commons recently, the cost of the Sleight-of-Hand expedition to the Arctic was \$159,370.92. This sum included the cost of ships and supplies.

Gulls begin to breed at the age of ten months.

## Mounted Police Of Canada

Force Must Watch Frontier: And Indians As Well As

The report of the Commissioner of the Royal Northwest Mounted Police, A. Bowen Perry, will be the last of its kind, as the designation of the body of men has been changed to the Royal Dominion Mounted Police. The report is for the year ending September 31, 1910. The old force has now become the sole federal police force of the Dominion, its authorized strength having been increased from 1,200 men to 2,500.

Its duties have been defined as follows: (a) The enforcement of federal laws; (b) The patrolling and protection of the international boundary line; (c) the enforcement of all orders-in-council passed under the "War Measures" Act, for protection of public safety; (d) generally to aid and assist the civil power in the preservation of law and order wherever the government of Canada may direct.

The course of his duties as Commissioner Perry touches on these duties as follows: To patrol the international boundary for the purpose of assisting the customs and immigration officials; to maintain law and order amongst the Indians on their reserves, and especially to prevent the use of intoxicants; to supervise the mining and industrial areas; to watch the activities of enemy nations and dangerous whose sentiments might be disloyal and attitude antagonistic; and to enforce law and order in the northwest territories and Yukon territory, and in the national park where the force is the sole authority.

The new force also took over from the Dominion Police the duties of registration and controlling of alien enemies, the enforcement of the Military Service Act, the maintenance of the secret service and the protection of the navy yards at Esquimaux. Naturally, some of these duties raise the question of the war have ceased to be effective. The report points out that "the general situation in western Canada during the past year has caused anxiety. The war left the world normally, physically and materially exhausted, and unrest everywhere. Canada has not escaped. Sections of our population have been affected and as a result, some of the forces have had a sinister purpose although probably not realized by many who took part. The most serious was the Winnipeg strike which occurred last May and which led to sympathetic strikes in Brandon, Saskatoon, Edmonton, Calgary and Vancouver."

Remembering that during the war enemy aliens in the Dominion gave no cause for anxiety, comparatively few of them being interned, the commissioner reports as follows: "Before the war, many had been employed in railway construction which caused them to be broke out, and these people sought employment in the large industrial centres and filled the place of our fighting men. They, as well as all foreigners, received the most considerate treatment as long as they obeyed the laws of the country and pursued their ordinary vocations. The returned soldiers found them filling their place and enjoying themselves in Winnipeg, Calgary, Medicine Hat, and other points, the resentment of the soldiers found expression in small disturbances provoked by the indiscreet acts and words of these people, who, as a body, have shown little appreciation of the just and fair treatment meted out to them by the people of this country. They have shown themselves ready to follow and support the extremists who play upon their ignorance and appeal to their national prejudices and sympathy for the Central Powers. Bolshevism finds a fertile field among them and is assiduously cultivated by the ardent agitator. The assimilation of our large Indian population is of the greatest importance and it demands wide and sympathetic action and constant attention."

## The Future of Western Wheat in

The word Durum is not applied merely to a variety of wheat, but to a group of varieties which differ from each other almost as much as the various sorts of ordinary wheat. The Durum varieties have, however, several characteristics in common. They are usually headed and have short, compact heads; the straw is rather weak; the kernels are extremely large and, as a rule, exceptionally hard. Most or all of the Durum varieties are more resistant to drought than ordinary wheats. This does not mean, however, that they will produce a good crop under very adverse conditions. Some of them show a good deal of resistance to rust, though they vary considerably in this respect. In the bread-making qualities of the flour made from Durum varieties, there are very large variations. Some of these varieties, such as Kukana, are excellent for bread-making, while others, the majority perhaps, are decidedly inferior. The flour is usually of a yellow color, sometimes bright and pleasing as in the case of Kukana, and in others dark and unattractive. It is obvious, therefore, that if one decides to grow Durum wheat, the choice of the variety is a good one to be made, not a matter of indifference.

The objections to the best varieties of Durum wheat arise not only from the color of the flour, (a shade which is not fashionable at present), but to the extreme hardness of the flour. Durum wheat in pure condition cannot be ground into flour by exactly the same system as ordinary wheat, and if the miller has to deal with a mixture of Durum wheat and common wheat, the problem presented is very troublesome. Naturally, the miller will endeavor to change in their methods and will not do to large a shortage of ordinary wheat and

the presence on the market of considerable quantities of inferior flour. The yellow color of the flour is an objection the seriousness of which can easily be exaggerated. Provided, as in the case of Kukana, the color is bright, it is hard to imagine that the public would refuse to purchase the flour. The usual demand, however, is for white flour, and for yellow butter, even if it has to be artificially colored. Of course the public is not very logical in setting these standards, but those who grow wheat for sale must bear in mind the wishes of the consumer.

In the northwest United States there was a hard struggle between wheat growers established as a recognized and profitable article of commerce. Probably a similar struggle will occur in Canada, and those who are growers in the growing of Durum wheat must very likely find it profitable, though it seems almost certain that the Durum varieties will be more remunerative to farmers in the southern portions of Alberta and Saskatchewan than the varieties which are now usually grown there.

It is difficult to advise farmers what should be done at present. So long as the demand for Durum wheat for sale purposes all will go well, but it will be a different matter when attempts are made to sell the Durum wheat as a matter of commerce. A commission firm in Winnipeg has been quoted as having given the following advice: "Do not grow Durum wheat until more is grown." This sums up the matter very well. A farmer, before venturing on a kind of wheat, should be sure that there will be a profitable market for it. Such a market will not likely exist for Durum wheat until large quantities of Durum wheat are available.

## New Packing Plant For Moose Jaw

Large Field to Draw Firm In The Ranching Country to the North and West

The industries of Moose Jaw, Saskatchewan will shortly be augmented by a new slaughter and packing company, the Mid-West Packing Company, Limited. This company has secured an option on some property formerly used as a brewery and will shortly commence construction of the installation of the necessary equipment for an up-to-date plant. The company has been registered in the province of Saskatchewan with a capitalization of \$175,000. The provincial directors are all well known local business men.

The premises, which will include a slaughter house, packing plant and cold storage accommodation, will be for from the local slaughter, in that it will be available for use to individual butchers and farmers for personal use in slaughtering about the company tending the options of purchasing the product, selling it on commission and storing it in their cold storage plant.

A power plant on the premises, together with refrigerator and storage accommodation will make it possible for the company to begin operation in the near future.

L. B. Edmondson, former general manager of the local slaughter of Gordon, Ironsides and Fares, will occupy a similar position with the new firm. Mr. Edmondson is the most valuable man in the packing industry in Western Canada. Robert Crutchenbach, another of the promoters of the Mid-West Packing Company, is the largest individual rancher in Saskatchewan, owning huge tracts of grazing lands to the north of the city. The third member of the directorate is W. P. McLean of the firm of Robinson MacLean & Moose Jaw.

With the establishment of the Southern Saskatchewan stock yards at Moose Jaw, it is considered that the packing industry has a great future in Moose Jaw. Not only is there a large field to draw from in the ranching country, the number of immigrants entering Canada was 3,730,521. Not only statistics of immigration from this country are available from the department of immigration and colonization.

Work will be commenced immediately on the property and every effort will be made to have the plant running to capacity before the fall trade opens.

You can't always tell what's in a bottle by reading the label.

Office seeking may be neither a trade nor a profession, but a disease.

## Growing Interest In Western Canada Farms

Settlers From U. S. Are Welcomed In True Community Spirit

Increased interest in western Canada farms has been manifested by the United States, and bright prospects for a big influx of American settlers, from the prairie provinces to the coast, are reported by the vanguard of new farmers from across the line. To some extent the interest is due to the extremely low prices of lands prevailing in the States and in a large measure to the hospitable treatment of the new settlers by people of the communities in which they have located. Land prices in Western Canada, while cheaper than elsewhere with those in the United States, give the purchasers as good, and in many cases, much better land, as well as a saving of expense.

Near Dwight, Illinois, for instance, land that sold for \$40 an acre twenty years ago is today selling for \$600 an acre. An English syndicate owns a large estate of 50,000 acres near Dwight, and has been renting it for \$10 an acre. Lately the rental has been increased to \$25, with the result that many tenants are vastly dissatisfied and are bent on leaving the country. Naturally they have turned their attention to Canada, as a country where they can make permanent homes for themselves, and where their children will not have to face the problem of high rents of land. Purchasing land at \$200 an acre is in the nature of the question for practically all of them.

Some of these Illinois farmers purchased in Manitoba and Saskatchewan last year. They were loth to leave their old homes and seek their fortune in a new land, as they felt they would be amongst strangers, who in any way would be interested in their welfare. They were surprised and delighted, however, on arrival to be met at the stations by the people of the communities in which they had been told to locate, who welcomed them to their new homes and served them with sandwiches and coffee. Their houses had been located by these cordial neighbors, they had been hauled into the barns for their stock and in one case a community social was held in the church to make them feel at home and to give them an opportunity of at once becoming acquainted with their neighbors. These settlers are now sending enthusiastic letters to their friends back in Illinois and Iowa, telling them of comfort and how they have found them and urging them to come to Canada and establish homes here.

Champion of Canada

Producing 21,369 pounds of milk, yielding 1,261 pounds of butter under no official test for one year, a senior year-old Holstein heifer has attained another world's record for the Calgary Fair held at Edmonton, B.C., and becomes champion of Canada. This animal is being "grown" to beat the record of the famous California cow, Tilly Alcap.

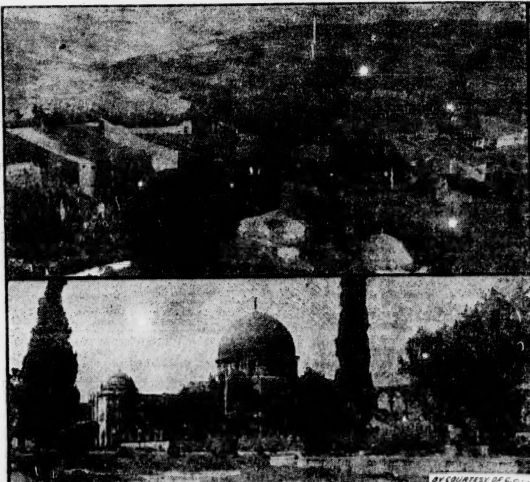

W. N. U. 1312

## A Remarkable Frenchman

M. Paul Mantoux, Unquestionably the Greatest Interpreter Living

London has just been entertaining a singularly interesting personality in M. Paul Mantoux, Director of the Political Secretariat of the League of Nations. M. Mantoux has an unrivalled knowledge of contemporary international law, for he acted as official interpreter throughout all the Peace Conference at Paris. There is probably no man alive with a greater knowledge of official secrets and his discretion is quite as remarkable as his knowledge. And it is unquestionably the greatest interpreter living. His methods were at once the admiration and the despair of the allied plenipotentiaries. Except during the very longest speeches when he made a casual memorandum or two, he never took down a note, but trusted entirely to his memory. As soon as one of the plenipotentiaries had finished a long, important and highly technical speech, M. Mantoux used to rise in his place and give the conference an immediate translation of it without hesitation, with every shade of meaning most carefully expressed.

## SCIENTIFIC AGRICULTURE IN SASKATCHEWAN

Upper Picture—Students' Residence, University of Saskatchewan. Live Stock Pavilion in the background.  
Lower Picture—"Better Farming Train," showing how instruction is carried to the farmer.

Some of the iron pyramids in the upper windows of such splendid universities as Oxford, Cambridge or Harvard, such an institution as the University of Saskatchewan had not even been imagined. When Sir Wilfrid Laurier, who laid the corner stone of this new university July 20th, 1910, was a student going over the books for his Indiana law school on the beach of Lake which is the site of the buildings shown in the accompanying photographs, and walked the waters of the South Saskatchewan river and saw the valley and the prairie soil.

Although the prairie soil was as rich as the river and the hills that are now, the City of Saskatoon was unincorporated. Even as late as twenty years ago when now stands a city of 25,000 people on three lines of railway, there were not one hundred men, women and children and have been bound in a few tents and shacks. The widest enthusiasts would hardly have dared to prophesy that one day a university would grow here—yet there it stands today.

The buildings of the University of Saskatchewan stand on the east of Saskatoon and the site could hardly have been more fortunate. Chosen, if its slides had a mile of well-wooded river front and altogether of 1,000 acres, 1,000 acres of rich land, 250 acres of which are set aside for a campus, 100 acres for purposes of agricultural experimentation and 400 for the Agricultural College farm. The plan provides for the eventual accommodation of 5,000 students.

The present buildings consist of an administration building, a hall and offices for the different departments as well as class

rooms, two students' residences, one containing a spacious dining hall and the other a gymnasium and swimming pool, an engineering building, livestock pavilion and up-to-date model farm buildings. All the buildings conform to the prearranged plan and will, like those already erected, be of stone in the Gothic style. Work has just recently begun on a new science building. There are also several private residences on the campus, the two principal ones provided for in the architect's plan being those of the President of the University and the Dean of Agriculture.

The buildings of Emmanuel College, a church of English University school, the first of its kind in Saskatchewan also occupy a part of the campus. The University grants sites of from three to five acres to such affiliated colleges at a nominal rental. Eight thousand dollars has already been subscribed towards a beautiful structure which will be the home of the Presbyterian College.

The university provides degrees in Arts, Science, Law, Agriculture, Civil Engineering and a Diploma in Pharmacy.

The present enrollment is between 1,400 and 1,500, including returned soldiers who are retrained in various branches of skilled work, particularly engineering. Scores of promising returned soldiers have been taken into the capable motor mechanics, steam engineering and the handling and repairing of farm machinery are also taught. Agricultural students, principally the sons of farmers, are training in livestock handling and judging, and even in the care and management of poultry.

An important feature of the work of the University of Saskatchewan about 2,000.

New Standards of Value  
\$1465  
F.O.B. CHATHAM  
WARTAX EXTRA  
GRAY-DORT

Gray-Dort has brought peace-time standards of value to the motor car business. Greater value than the light car has heretofore offered. \$1465 brings you a car comparable with those costing several hundred dollars more.

## LOOK FOR THESE THINGS IN THE CAR YOU BUY

The Gray-Dort motor is a big enough for its job—not stunted—31" bore and 5" stroke—with big water jackets and a big, honeycomb radiator. The crankshaft is bulky—many pounds heavier than other builders of light cars think necessary. The pistons are extra-light and three-angled. Special design prevents valve-warping. High-carbon steel gives toughness to moving parts.

The carburetor is a Carter-improved this year. Westinghouse starting and lighting. Connecticut ignition (constantly improved). The whole chassis parallels the motor in quality. Heavy frame of channel steel. Husky rear axle, Chatham-built. Long springs, cantilever in the rear, and built here under our inspection. The big brakes now have Thermoid lining. A new steering gear, 50% larger and stronger than the light car standard.

The Gray-Dort is as pleasing to the artist and to the driver as it is to the mechanic.

The smooth lines of the body are result after so much of the extreme in present-day cars. The Gray-Dort finish, development of 60 years' coach-building, will win your instant and lasting approval. Add the smartness of French-plated upholstery, and a new top, tailored in our own shops.

The big gasoline tank is now in the rear—for good-looks and convenience. As in big wars, the emergency brake is on a lever—the side-curtains open with the doors. A shifter, smarter coil gives more room in the driving compartment. The new hood, with its many long, narrow louvers has a touch of European smartness.

## AND YET THE PRICE IS \$1465

PLUS WAX TAX  
You know that such a car as the Gray-Dort will be in heavy demand at \$1465. We have doubled our production this year. But there is likely to be a shortage. See the Gray-Dort dealer now.

## PRICES

The Gray-Dort 5-passenger car, finished in Gray-Dort green and black with standard equipment is \$1465 f.o.b. Chatham. War tax extra.

The roomy 2-passenger roadster is the same price.

## THE GRAY-DORT SPECIAL

For the man who wishes something a little extra in his car, we have built the Gray-Dort Special. Maroon body, with brown rayette top. Plain glass over windows and curtains. Rocker-top wheels. Motorator. Tilting steering wheel. Real leather upholstery. Mahogany instrument board. Just the touches which lift this car above the ordinary. \$150 extra on the standard.

## AND THE ACE 1

The Gray-Dort Ace—the most beautiful light car of today. Sapper green body with handsome California top to match. Trouble Lamp and bull-eye flashlight. Electric side-lighter. Rear-view mirror. Plate glass windows. Overize, grooved-tread tires. This is the Ace car for the man who does not wish to pile up a tremendous operating cost. \$25 extra on the standard.

## Claresholm Local News

If sick, ask Khaym.

Frank Wall moved into his new residence this week.

J. L. McCrimmon spent Monday and Tuesday in Calgary.

Carl Edlund has taken a position with the Claresholm Garage.

Mr. and Mrs. Sisson are spending a few days in town this week.

Mrs. Ray Laidlaw and daughter were visitors in town on Thursday.

Mrs. John Dahl spent a few days visiting with Mrs. Perrett at Staveland last week.

Mrs. R. Elcote and daughter Daisy were visitors in town for the week end at Mrs. and Mr. J. A. Harrison's.

L. G. de Forest spent a few days in town this week. He left on Wednesday with his car to motor to Drumheller.

The U. F. W. A. will meet on Saturday afternoon, May 29th, at 3 o'clock, in the Parish Hall. The annual report and year book will be given out at this meeting. Thrift will be the subject for the program.

William Pope, a boy of 14, was arrested at Nanton a charge of theft from Staveland and being already a ward of the Department of Neglected Children, was committed to the Industrial School at Portage La Prairie, Man.

At Staveland last week a charge of assault was laid against Mrs. McCuaig charging her with assaulting Mr. Vernum the principal of the Staveland school. Magistrate Rurrell of Lethbridge handled the case. Accused's husband entered a plea of guilty on her behalf and paid a \$10 fine.

E. H. Mack, the genial C.P.R. agent here, had his new Chevrolet car out on Monday for the first time. Mr. Mack is getting on very fast in the way of driving a car. Outside of trying to start it for half an hour without any gasoline, and running over a dog, and then into George Carney's fence, he is getting on famously.

Fear of a terror-stricken inheritance shatters Helen Winthrop's dream of life only to lead her straight to her heart's desire. In "The Fear Woman," Pauline Frederick reaches the very height of her inimitable art. You will live every minute of the "Fear Woman's" sorrows and joys, and relish the reward she earns in the end. Coming to the Rex Theater next Wednesday and Thursday.

A brother of J. F. de Forest has been visiting Claresholm recently. He is an artist from Vancouver where he has been widely known as a painter of B. C. mountain scenery. He brought with him a collection of small paintings which many of our citizens were privileged to see. He has been a great traveler having visited New Zealand, Australia, Palestine, Egypt and most of the European countries. There are few parts of the American continent that he has not visited. He left on Wednesday for Fincher Creek and will return here next week.

### Important Notice to Farmers

It is a well established fact that each of the following legumes: alfalfa, field peas, alsike clover, red clover, white Dutch clover, white sweet clover, yellow sweet clover, sweet peas require a particular kind of bacteria to produce the more vigorous growth of stems, leaves, and seed. The bacteria living within the nodules or swellings have the power to gather the free nitrogen of the air and to build it up into nitrogen compounds which are very essential to the growth of the plant and the production of seed. The greater the number of these bacteria that occur within the roots of a plant the more vigorous the plant is.

In order to secure the necessary kind of bacteria in the soil in which a particular kind of legume is to be grown, the inoculation of the seed with a pure culture is recommended. The cultures are usually grown in two ounce bottles, each bottle containing sufficient bacteria to inoculate sixty pounds of seed. Full directions are enclosed with each mailing case. The cultures for the inoculation of

the seed of alfalfa, field peas, alsike clover, red clover, white Dutch clover, white sweet clover, yellow sweet clover, crimson clover, and sweet peas, may be had by applying to the Principal of the School of Agriculture, Claresholm, Alberta. Applicants should state the number of each kind of culture that is required. The price of each is twenty-five cents per culture.

To every reader of The Review Advertiser, this announcement brings a message of supreme interest, a message fraught with tidings both great and joyous, for on Saturday, May 29th, Christy Bros', greater united wild animal exhibition will give two performances, at 2 and 8 p.m., in Claresholm. For over a score of years Christy Bros. Shows have stood for all that has been biggest, best and supremely novel in the world of amusements. Beginning in a modest way, they have slowly but surely built up an institution of vast proportions so familiar to the public, in addition to introducing many innovations in the amusement world in the form of splendid new methods of presenting acrobatic performances and magnificent pageantry. This year's program offers many new features and displays, presenting scores of America's most famous artists, and a colossal exposition of wild animal wonders of every clime.

### BUSINESS LOCALS

Wanted—Maternity work. Address Box 314, Claresholm.

For Sale—Registered Short-horn bull, red, and a good one.—C. A. O'Neil, Phone R613.

For all kinds of team work, including garden plowing, call on J. B. Butts, Claresholm.

For Sale—Pure bred Hereford bull, registered, for sale cheap.—F. Downs.

For Sale—Three good milch cows, just fresh. Dickinson Bros., Woodhouse. Phone R1306.

Strayed—Bronze turkey gelder, clipped wing. Finder please notify W. E. Atkinson, Pioneer Elevator, Claresholm.

For Sale—A well built cottage and far from the public school. Plastered, water, light, gas. Apply F. S. Downs, Claresholm.

Eggs for Hatching—White Wyandottes, good winter laying strain, \$1.50 per setting.—R. G. Sisset, Meadow Creek. Phone R710.

For Sale—Steam threshing outfit with 10 bottom breaking plow. Will sell engine and plow separate, at a bargain. Inquire of F. Downs, Claresholm.

Lost—Either on the road northeast of town or at the tie-post in town, a tweed overcoat with velvet collar. Reward will be paid for its recovery. Please leave at Review office.

For Sale—One 15-30 International tractor; one 4-bottom P & O tractor plow; one 4-furrow sub-surface packer; two 10 foot tractor disc harrows, tandem, out-throw and in-throw. Terms to responsible parties. Apply to Joseph Groun, at Carl Brann's store.

For Sale—One pure bred Short-horn bull. Apply F. S. Downs, Claresholm.

## Western Provinces Are Forging Ahead In Dairy Production

Canada's dairy product yielded approximately \$30,000,000 in 1919. Of this amount, about \$65,000,000 was received for exports. These figures easily constitute a record for the Canadian dairy industry. In 1910, the total value was estimated at \$10,000,000, and the exports amounted to \$2,400,000. Although the production of most dairy products made a fairly constant increase during the period of the war, the phenomenal record of 1919 must be attributed in large measure to the market conditions. In common with other food products, the prices of milk, butter and cheese rose rapidly to a world shortage. Then, too, the more rapid growth of urban centers as compared with the rural population has enlarged the home market, without a corresponding increase in production. Further the shortage of labor on farms throughout the war restricted increased production materially, and the comparatively rapid expansion of the conditions and position of milk trade affected these industry adversely. Lack of these factors tended to increase prices. Thus in 1918, the average price paid for cheese by the Dairy Food Commission was 23 cents, eggs, steamship, at Montreal. Although such statistics are not available for 1919, it is probable that the price exceeded 27 cents.

### Lightning Dangers Of Early Spring

Wire Fences to Protect Your Cattle During Storms

Though electric storms reach their highest frequency during the heat of summer they often occur in the spring and fire losses caused by lightning are by no means unknown in April and May.

Lightning rods have proved an almost absolute protection. It is only in very rare instances have they been known to fail, and even in these cases, the failure was probably due to defects in installation or deterioration.

Examine your lightning rod installations for broken insulators, for bonds in the cable which allow connection with the framework or other portion where it enters the earth. The latter is an important point. The electricity is carried into the ground by means of the cable, but, if it corrodes, and the ground connection is thereby broken, a fire is very liable to result. See to it that the cable is not advisable to use ground wires about every five rods. Lightning is attracted by wire fencing and, as, during a storm, animals will frequently touch the fence, many of them are killed by contact with the wire. These ground wires may be of about No. 9 gauge wire, given one foot apart, one strand of the fence, and carried into the earth beside the fencepost.

### Trapping is Profitable

Prosperous Indians May Find More For Getting Intoxicated

For trapping, to the men who know how to carry on operations, is profitable this season, according to game guardians who have returned to headquarters from inspection trips with stories of the large sums made in the north of the province. Half breed, after two weeks of trapping, sold his catch of mink, marten, and fox for \$600; another made over \$200 in a month. Five dollars a skin is being paid the Indians for muskrats and some of them are enjoying their prosperity to such an extent that they are returning to the north, who heretofore have used two skins as a kind of barter for drink, have now turned to the hunt for the first time in three weeks and costs in addition.

B. C. May Have Iron From India Soon British Columbia may find herself in possession of an iron and steel industry, launched and operated by the government of the province. When William Shaw, minister of mines, stated in the legislature on the second reading of the bill to extend the operation period of the Iron Ore Resources act until 1928. The bill, he said, was in line with the government's policy to leave nothing undone to bring about establishment of an iron and steel industry.

The new province of Canada-Slovakia has an area of between 30,000 and 60,000 square miles and a population of 12,500,000.

## De-Horning Adds to Value

A New Zeal Shown in Canadian Cattle Campaign

A zeal has entered into the campaign for de-horning Canadian cattle. The example of the most successful farmers is being copied by those quick to seek the money value of the practice.

Probably a quarter of a million dollars a year are lost to farmers by the necessities of a single de-horning process.

Live stock exchanges in Winnipeg, Toronto and Montreal especially encourage de-horning. Practically all the American native cattle, with which Canadian farmers in the West have to compete, have the advantage of being thus treated. They bring a larger return in dollars and cents.

In a circular by the Dominion government, farmers are told they will benefit financially for the following reasons: 1. Better appearance of the cattle. 2. Quicker, sublimated, embarking of cattle for less cost. 3. More cattle can be shipped in one car by rail, saving freight cost.

But it is when the animal is really brought to slaughter that the value of de-horning is proved. Over 70,000 lbs of meat a year are actually required to inspect Canadian packing plants alone as wasted through bruises in the flesh. Most of the bruises are caused by the animals' horns, labor costs as much as the waste.

That total represents the parts of meat utterly thrown away. There is a further and even greater loss. When a piece of meat is removed from the rest of the carcass or part of it, has often to be sold at a cent and one-half or two cents a pound less—not because the meat is poor, but because of the fact that it has lost in appearance and sale value. Probably one in every five cattle bought on Canadian yards suffers from injury which could be prevented were de-horning commonly practiced. The packers' buyer necessarily takes the loss into account and the farmer who sells the cattle takes the risk and a lower price.

A united effort is now being made to have the Dominion and Provincial Live Stock Boards, held in Regina recently. Practically the entire board was present and it was decided to request the Saskatchewan department of agriculture to co-operate with the board by assuming transportation charges and assisting in organizing the exhibit. As the competition in this show is as keen as anywhere in the world it will be necessary to commence fitting exhibits immediately and the Live Stock Board will assist in inducing prospective exhibitors to prepare their animals for the big show.

In anticipation that the government will accede to the request a special committee was appointed to take the matter up with the Dominion department with F. Hefley Auld, deputy minister of agriculture and J. G. Robertson, livestock commissioner, the committee consists of R. A. Wright, Drinkwater; W. H. Gibson, Jordan; H. R. Taylor, Condit; George R. Lamont, Dr. H. H. Regan; G. N. Buffum, Bernhard; Robt. Sinton, Regina; A. M. Shaw, University of Saskatchewan; R. W. Carwell, Saskatoon.

### Coolies For The West

Original Solution of Labor Problem Still Being Considered

The proposal which it is understood has been made to the Ottawa government to bring Chinese coolies to western Canada to carry on railway construction and similar work, under an arrangement similar to that which was made under the contract during the war, is engaging the attention of various boards of trade and others.

### Cattle Breeders Plan Sale

Manitoba cattle breeders have decided to hold a sale in the Exhibition Park, Brandon, on Wednesday June 2, entries to close May 5. All animals entered are to be subject to inspection by a committee appointed by the board.

A famous firm of Sheffield cutlery shows various a knife with 1,000 blades. Ten new blades are added to it every tenth year. A second curiosity of which the firm is proud consists of three pairs of scissors so minute that all three can be covered with an ordinary thumbnail.

Four acres of Russian sudanwood will be planted at the Dominion Experimental Farm at Lethbridge, Alberta, this spring, and Superintendent Fairfield is going to make a strenuous effort to beat the 346 record established by G. H. Huston on the C. P. R. Demonstrative Farm at Strathmore last year. A sale is now being held on the farm and there will be no question about carrying the sudanwood experiment to its proper conclusion next winter.

### Camels are fit for work at five years old; although they usually live forty years, they are usually begins to decline at twenty-five.

Camels are fit for work at five years old; although they usually live forty years, they are usually begins to decline at twenty-five.

Part of Rockaway Beach, N.Y., after the great storm which smashed four hotels and several iron piers, doing about \$2,000,000 damage.

## Flour Milling In Canada

Figures Showing Amount of Production For Past Three Years

For the last five months, September to January inclusive of the last three years, the following quantities of flour were manufactured by Canadian mills: Crop year 1917-18, 8,079,842 barrels; crop year 1918-19, 7,729,347 barrels; crop year, 1919-20, 8,770,790.

In the month of February, 1920, the grind was 938,430 barrels; in 1919 760,285 barrels, and in 1918, 1,550,043 barrels, making a six months' total of 2,257,145 barrels. For the year 1919-20, 22,203,305 barrels; 1918-19, 8,489,732 barrels; 1918-20, 9,729,229 barrels.

From September 1, 1919, to February 29, 1920, there was purchased from Canadian mills for export, 4,178,729 barrels.

The export from Canada in the two previous recent years as shown by the customs' returns for the corresponding periods, as follows: crop year of 1917-18, 5,315,842; 1918-19, 4,128,391.

Figures are not available for the total production in Canada for the previous years, 1918-19, but the customs' returns of export are as follows: 1916-17, 7,088,602; 1915-16, 7,897,451; 1914-15, 4,897,129; 1913-14, 4,666,267; 1912-13, 4,373,872; 1911-12, 4,273,472.

### May Revolutionize Agriculture

New Method of Intensive Production Said to Have Been Discovered

A dispatch from Paris states that experiments which are now being conducted in a chemical laboratory at the Sorbonne and on a much vaster scale in the open air may be of the greatest importance to agriculture. They will revolutionize the industry.

There is no doubt about the results, and a new method of intensive production has been discovered. Hitherto the benefactor of mankind who made two blades grow where one grew before, did so at the expense of the soil, which had to be fed or which became exhausted quickly. One might almost say that although the production of the earth could be increased it could not be really, when this exhaustion is considered, be increased.

The new researches are on different lines. It is not the ground which is being treated, it is the seed. The seed, in the best sense, gives a dose of the constituent chemicals of the plant. The product is much more potent without the smallest deterioration of the soil. At least, all this was what was claimed by the scientist who was good enough to tell something about his secrets. Any discoveries of this kind ought to be made known without delay. France for instance is producing about half the quantity of wheat which she produced before the war, and it is difficult to help the farmer realize France self-supporting needs.

### Practical Ideas

There is no likelihood of poison gas being used to stop the grasshopper plague throughout the prairie provinces is announced by the department of agriculture. Tested methods of control of the department and well acquainted with the gas, believed it would destroy vegetation, also that it would be too costly owing to changeable wind conditions.

At the signing of the armistice, the total of German bombing and scouting airplanes had fallen to 1,700, while the allies had three machines on the front to every German one.

## Some Facts About Wheat Growing On Western Prairies

What is Canada's most important crop? It covers 36 percent of the area and forms 25 percent of the value of all crops. The centres of production are in the plains provinces and the peninsula of Ontario, the former being by far the most important.

Saskatchewan alone has more than one-half of the wheat acreage of the Dominion and ranks highest in the value of wheat relative to that of all crops. Manitoba and Alberta together have more than three-fourths of the balance.

The Canadian crop is mainly spring wheat, but winter wheat is found in Ontario and Alberta, and a small acreage in Manitoba. In Ontario the heavy snow and lack of extreme temperatures favor winter wheat. High rainfall (30 to 40 inches), and humidity produce also a soft winter. Southern Alberta, owing in part to the warming influence of Chinook winds, has shorter and milder winter than the other western provinces. Owing to the dry climate the wheat is very hard.

The small amount of winter wheat grown in Manitoba is produced in the wooded parts of the north, chiefly in the Swan River Valley. Owing to the semi-humid conditions this wheat is "plush" or at best semi-hard.

The great wheat belt of Western Canada is limited on the north by a short growing season and low summer temperature, and on the southwest by insufficient rainfall.

The small population of Canada does not require the entire supply of wheat produced. On the average over one-half of the crop is exported and the exportable supply is increasing annually. At the same time, Canada has the highest per capita consumption of wheat in the world (16 bushels including what is used for stock).

The wheat crop of Western Canada is at present largely confined to the open prairie region of the prairie provinces. This area has been found cheaper to "break" and being less liable to early fall frosts has been the first to be developed for wheat growing. It will be noticed that over 95 percent of the crop in the prairie provinces is spring wheat. In southern

Alberta rather more than ten percent of the crop is winter wheat. In the northern Manitoba a very small acreage of winter wheat is grown around Swan River.

In all the prairie areas the wheat is very hard and of high quality when satisfactorily matured. This applies to both early spring and winter wheat. The spring wheat grown in the prairie belt is likely to be plaid or semi-hard, and the winter wheat at present grown in the Swan River Valley is of similar texture.

The soil conditions that in general make these conditions are the fallow, "breaking" and corn ground or land having produced some other food crop. Fall plowing and stubble land are, however, frequently seen to wheat. Under the rotations followed at present, the wheat acreage is chiefly composed of fallow and fall plowing. Each of these methods of preparation has some disadvantages and some advantages under different conditions of soil and climate. These may be briefly stated as follows:

The fallow is the waste applied to land that has lain idle for a year, no growth of crop or weeds having been permitted, and the soil left in such a manner as to store and conserve the moisture. The fallow is a year (2) the soil is left in (3) its at least partial improvement against drought (2), the development of available plant food in the soil (3) and the soil is left in (4) its at least partially ready to grow as soon as spring comes (5) permits of a better distribution of farm work.

The disadvantages of the fallow are: (1) it results in the loss of the soil (2) the soil is left in (3) its at least partially improvement against drought (2), the development of available plant food in the soil (3) and the soil is left in (4) its at least partially ready to grow as soon as spring comes (5) permits of a better distribution of farm work.

The disadvantages of the fallow are: (1) it results in the loss of the soil (2) the soil is left in (3) its at least partially improvement against drought (2), the development of available plant food in the soil (3) and the soil is left in (4) its at least partially ready to grow as soon as spring comes (5) permits of a better distribution of farm work.

### Retail Meat Prices Drop

Dominion Department of Labor Shows Interesting Figures

Cost of living, according to the standard budget, prepared by the Dominion Department of Labor, is still mounting rapidly, though the retail meat prices of foods show a drop. The single price of meats was recorded in July last.

Figures from the last issue of the Labor Gazette show the tendency of prices in 1914 than any other period in Canadian food prices. The following are taken from the department's returns:

Meat groups February, 1914, \$2.38; July 1919, \$4.37; February 1920, \$4.16; percent of prices in 1914, 176. Dairy products: February, 1914, \$2.71; July 1919, \$4.35; February, 1920, \$5.15; percent of prices in 1914, 190. Cereals: February, 1914, \$1.16; July 1919, \$1.71; February, 1920, \$2.34; percent of prices in 1914, 218. All Foods: February, 1914, \$2.71; July 1919, \$4.35; February, 1920, \$5.15; percent of prices in 1914, 200.

### Prohibition A Success

Canada Not Injured By Liquor Laws Says Bishop

Bishop Richardson, of Fredericton, N.B., in a lengthy letter to the Toronto Times, disputes Professor Stephen Leacock's recent assertion in the same journal that prohibition has been an appalling failure in Canada. The bishop says that Prof. Leacock is so closely associated with a certain delinquent humor, that it is only easy to see how he intends to be taken seriously, but to solemnly affirm that the supporters of prohibition are possessed solely by delusions and that their fellow-citizens would be otherwise from any other view.

I admit frankly there are some grave weaknesses in the enforcement of the prohibition law," continues Bishop Richardson. "But I am profoundly convinced that prohibition brought with it moral and economic benefits of untold value which far more than compensate for any losses. The adoption of prohibition in Canada, considered as a whole, is far from being an appalling disaster, but a magnificent success."

### 46 Death Sentences Commuted in 4 Years

Forty-six death sentences were commuted by the department of justice in the last four years. Forty of the condemned are now serving life sentences, five are serving terms from ten to twenty years (imprisonment and one was granted a year, which is now pending. Of the above cases, seven were tried in Ontario courts, nine in Manitoba, six in Quebec, six in Alberta, five in British Columbia, four in Saskatchewan, three in Nova Scotia, two in New Brunswick, one in Prince Edward Island and the Yukon.

### To Grow Hemp In Manitoba

J. Lohr, for many years proprietor of the Hill Hotel at Port Huron, Mich., is reported to have purchased 7,000 acres of land at Grand Marais, where the mill grew hemp. It is said that he is now experimenting with hemp, and that he will be the first to grow it in the prairie provinces.

Chilled fish from Newfoundland is priced in this section at 10 cents a pound, with a capacity for handling over 200,000 pounds of fish a day.

STANLEY PARK, VANCOUVER, B.C.

English Bay Road, Stanley Park

Vancouver would be famous if it had only the attraction of "Stanley Park" was the opinion of an English tourist who had visited the place. That tourist's playground of 1,000 acres of virgin forest, with every acre of its surface water-fronted by over six miles of marine panorama of park beauty. In the greatest municipal park on the continent. It is fringed by English bay, which, alternating with natural formations of forest trees and kinds of every shade and plumage have on the surface. No outwards or ocean wall, where the heavily forested hillsides disturb tranquility, but there is all the beauty and majesty and beauty of its island surface with a soft calling of the waves.

The park is picturesque with its magnificent firs and cedars, and its beauty in its natural state, yet with touches of the conventional in that it is encircled by a perfect motor road, which affords the pleasure of enjoying the incomparable points of interest in this woodland. The unique brilliancy of the landscape scenery in the distance where mountains of snow and glaciers term a group of peaks, rise and, seen and rose-colored, call one again and again by their enchantment. Down their pine-clad slopes, avian streamlets wind their spreading, their branches on the green lawn, greet the eye, creeping to, denigrate the base of these giants of the forest. Walk through the park reveal picturesque retreats where the aroma of nature in all her bewilderment of luxuriant growth, sweetens the out-of-doors. The "Hill of the Sleeping Beauty," "Snowshoe," the grave of the Indian Princess Potowat, "Painted Indian," who was once the oval's surroundings, a gracious smile of nature, are some of the points of interest.

The Largest Trees in North America Grow in Stanley Park.

The agitations caused through the writings of Sir Oliver Lodge, Sir Conan Doyle, and others, in regards spiritualism and mysticism have aroused the interest of the majority of people. "To be or not to be" is a predominant thought in the minds of all and every person is at some stage of life more or less curious in regards the hereafter. Do the dead live? Khaym, the Mystery Man of India, who appears at the Rex theater on Monday and Tuesday May 24th and 25th, assists the mind of the doubtful by his experiments in spirit messages and other occult phenomena.
